Dots on Tots

**Dots on Tots** 100% Certified Organic Cotton hats are toxin-free and protect your little ones from the harsh rays of the sun. Their fabric is extremely soft and has some 'give' across the grain, making it super comfy for baby. The cotton used for the hats is grown in fields without pesticides or chemical fertilizers and harvested without defoliants. The fabric is then manufactured, dyed and finished in the USA.

My little one is the center of my world. I know your little ones are the center of yours... Taking the time to do a little bit of research and read labels a little more closely to ensure we select products that are safe, healthy and comfortable for them, is so worth it!
