## MomPreneur Makes Eco-Friendly Caps for Kids

[ 0 ] Aug. 8, 2013 | SBO Editor

**Dots on Tots** is a baby headwear company, specializing in baby & toddler ear flap hats made from natural, certified-organic cotton. The owner/designer of the company, Olivia Entin, holds a Master's Degree in fashion design and technology and is a mother of two who knows the importance of natural and comfortable clothing for babies. Newborn skin is often very sensitive and it is important to choose the right clothing to avoid an allergic reaction. An important aspect of keeping children healthy is to protect their ears, and this is what led Olivia to design this unique "aviator" hat. The hats are absolutely seamless for extra comfort, double layered, and feature adjustable soft Velcro closure on the flaps. **All hats are eco-friendly, breathable, irritant-free, non-allergic and made in the US.**
